Index to Volume 1 January-December 1981

Subject Index

A

Abstracts, Council on Arteriosclerosis

Abstracts submitted to the 34th Annual Meeting, Council on Arteriosclerosis, American Society for the Study of Arteriosclerosis, Miami Beach, Florida, November, 1980, 52

Abstracts submitted to the 35th Annual Meeting, Council on Arteriosclerosis, American Society for the Study of Arteriosclerosis, Dallas, Texas, November, 1981, 353a

Acetoacetylated lipoproteins

Acetoacetylated lipoproteins used to distinguish fibroblasts from macrophages in vitro by fluorescence microscopy, 177

Acholeplasma laidawii

Cholesterol transfer from normal and atherogenic low density lipoproteins to mycoplasma membranes, 134

Adaptation to diet

Unresolved problems in the diet-heart issue, 164

Adenosine 5'-diphosphate (ADP)

Proaggregatory effect of fasting on platelet aggregation in the microcirculation of mice with streptozotocin diabetes, 127

Adiposity

Levels and interrelationships of serum and lipoprotein cholesterol and triglycerides. Association with adiposity and the consumption of ethanol, tobacco, and beverages containing caffeine, 13

Response of the aorta of the obese Zucker rat to injury, 186

Adolescence

Longitudinal study (32 years) of exercise tolerance, breathing response, blood pressure, and blood lipids in young men, 455

Age

Blood glucose and risk of coronary heart disease, 33

Levels and interrelationships of serum and lipoprotein cholesterol and triglycerides. Association with adiposity and the consumption of ethanol, tobacco, and beverages containing caffeine, 13

Longitudinal study (32 years) of exercise tolerance, breathing response, blood pressure, and blood lipids in young men, 455

Albumin

Effects of oscillatory mechanical disturbance on macromolecular uptake by arterial wall, 326

Local aortic histamine metabolism and albumin accumulation. Differences between blue and white areas, 265

Relationship of hypertriglyceridemia to atherosclerosis, 406

Stimulation of cholesteryl ester synthesis in macrophages by extracts of atherosclerotic human aortas and complexes of albumin/cholesteryl esters, 210

Alcohol consumption

Blood glucose and risk of coronary heart disease, 33

Dietary ethanol-induced modifications in hyperlipoproteinemia and atherosclerosis in nonhuman primates (*Macaca nemestrina*), 144

Levels and interrelationships of serum and lipoprotein cholesterol and triglycerides. Association with adiposity and the consumption of ethanol, tobacco, and beverages containing caffeine, 13

Relationship of hypertriglyceridemia to atherosclerosis, 406

Alloxan

Proaggregatory effect of fasting on platelet aggregation in the microcirculation of mice with streptozotocin diabetes, 127

American Society for the Study of Arteriosclerosis

Abstracts submitted to the 34th Annual Meeting, Council on Arteriosclerosis, American Society for the Study of Arteriosclerosis, Miami Beach, Florida, November, 1980, 52

Abstracts submitted to the 35th Annual Meeting, Council on Arteriosclerosis, American Society for the Study of Arteriosclerosis, Dallas, Texas, November, 1981, 353a

Androgens

Hormone receptors of the baboon cardiovascular system. Biochemical characterization of aortic cytoplasmic androgen receptors, 257

Angiography

Angiographic trials of lipid-lowering therapy, 242

Animal studies, baboon

Hormone receptors of the baboon cardiovascular system. Biochemical characterization of aortic cytoplasmic androgen receptors, 257

Relationship of lipoprotein cholesterol concentrations to experimental atherosclerosis in baboons, 3

Responses of serum lipoproteins to dietary cholesterol and type of fat in the baboon, 337

Animal studies, dog

Effects of oscillatory mechanical disturbance on macromolecular uptake by arterial wall, 326

Local aortic histamine metabolism and albumin accumulation. Differences between blue and white areas, 265

Animal studies, mice

Proaggregatory effect of fasting on platelet aggregation in the microcirculation of mice with streptozotocin diabetes, 127

Stimulation of cholesteryl ester synthesis in macrophages by extracts of atherosclerotic human aortas and complexes of albumin/cholesteryl esters, 210

Animal studies, monkey

Cholesterol transfer from normal and atherogenic low density lipoproteins to mycoplasma membranes, 134

Dietary ethanol-induced modifications in hyperlipoproteinemia and atherosclerosis in nonhuman primates (*Macaca nemestrina*), 144

Animal studies, pigeon

Aortic glycosaminoglycans in genetically selected WC-2 pigeons with increased atherosclerosis susceptibility, 192

Animal studies, rabbit

Changes in aortic lysyl oxidase activity in diet-induced atherosclerosis in the rabbit, 287

Effects of moderate hypercholesterolemia on rabbit endothelium, 25

In vitro synthesis of DNA, protein, and lipids by the de-endothelialized rabbit aorta, 418

Transfer of plasma lipoprotein components and of plasma proteins into aortas of cholesterol-fed rabbits. Molecular size as a determinant of plasma lipoprotein influx, 38

Animal studies, rat

Effects of insulin exposure upon the metabolism of rat aortic media: influence of hydrostatic forces, 345

Response of the aorta of the obese Zucker rat to injury, 186

Aorta

- Aortic glycosaminoglycans in genetically selected WC-2 pigeons with increased atherosclerosis susceptibility, 192
- Cannabinoids impair the formation of cholesteryl ester in cultured human cells, 449
- Changes in aortic lysyl oxidase activity in diet-induced atherosclerosis in the rabbit, 287
- Dietary ethanol-induced modifications in hyperlipoproteinemia and atherosclerosis in nonhuman primates (*Macaca nemestrina*), 144
- Effects of insulin exposure upon the metabolism of rat aortic media: influence of hydrostatic forces, 345
- Effects of moderate hypercholesterolemia on rabbit endothelium, 25
- Hormone receptors of the baboon cardiovascular system. Biochemical characterization of aortic cytoplasmic androgen receptors, 257
- In vitro synthesis of DNA, protein, and lipids by the de-endothelialized rabbit aorta, 418
- Local aortic histamine metabolism and albumin accumulation. Differences between blue and white areas, 265
- Response of the aorta of the obese Zucker rat to injury, 186
- Secretory phenotypes of endothelial cells in culture: comparison of aortic, venous, capillary, and corneal endothelium, 427
- Stimulation of cholesteryl ester synthesis in macrophages by extracts of atherosclerotic human aortas and complexes of albumin/cholesteryl esters, 210
- Transfer of plasma lipoprotein components and of plasma proteins into aortas of cholesterol-fed rabbits. Molecular size as a determinant of plasma lipoprotein influx, 38

Apolipoprotein

- Acetoacetylated lipoproteins used to distinguish fibroblasts from macrophages in vitro by fluorescence microscopy, 177
- Lipoprotein metabolism in nonresponders to increased dietary cholesterol, 463
- Lipoproteins in familial hyperalphalipoproteinemia, 156
- Multivariate analyses of serum apolipoproteins and risk factors in relation to acute myocardial infarction, 273
- Relationship of hypertriglyceridemia to atherosclerosis, 406
- Transfer of plasma lipoprotein components and of plasma proteins into aortas of cholesterol-fed rabbits. Molecular size as a determinant of plasma lipoprotein influx, 38

Apolipoprotein E HDL₂

- Acetoacetylated lipoproteins used to distinguish fibroblasts from macrophages in vitro by fluorescence microscopy, 177

Arterial disease

- Blood glucose and atherosclerosis, 227
- Blood glucose and risk of coronary heart disease, 33
- George Lyman Duff Memorial Lecture: Atherosclerosis: a problem of the biology of arterial wall cells and their interactions with blood components, 293
- Risk factors and raised atherosclerotic lesions in coronary and cerebral arteries. Statistical analysis from the Oslo Study, 250
- Unresolved problems in the diet-heart issue, 164

Arterial influx, plasma lipoproteins

- Transfer of plasma lipoprotein components and of plasma proteins into aortas of cholesterol-fed rabbits. Molecular size as a determinant of plasma lipoprotein influx, 38

Arteriosclerosis Journal, 1, 163**Atherosclerosis assessment**

- Noninvasive techniques for assessment of atherosclerosis. Summary of a workshop sponsored by the National Heart, Lung, and Blood Institute, January 1980, 50

Atherosclerosis, cerebral

- Risk factors and raised atherosclerotic lesions in coronary and cerebral arteries. Statistical analysis from the Oslo Study, 250

Atherosclerosis, coronary

- Angiographic trials of lipid-lowering therapy, 242
- Blood glucose and atherosclerosis, 227
- Blood glucose and risk of coronary heart disease, 33
- Risk factors and raised atherosclerotic lesions in coronary and cerebral arteries. Statistical analysis from the Oslo Study, 250
- Unresolved problems in the diet-heart issue, 164

Atherosclerosis, experimental

- Changes in aortic lysyl oxidase activity in diet-induced atherosclerosis in the rabbit, 287
- Cholesterol transfer from normal and atherogenic low density lipoproteins to mycoplasma membranes, 134
- Dietary ethanol-induced modifications in hyperlipoproteinemia and atherosclerosis in nonhuman primates (*Macaca nemestrina*), 144
- Relationship of lipoprotein cholesterol concentrations to experimental atherosclerosis in baboons, 3
- Response of the aorta of the obese Zucker rat to injury, 186
- Transfer of plasma lipoprotein components and of plasma proteins into aortas of cholesterol-fed rabbits. Molecular size as a determinant of plasma lipoprotein influx, 38
- Unresolved problems in the diet-heart issue, 164

Atherosclerosis, femoral

- Angiographic trials of lipid-lowering therapy, 242

Atherosclerosis, pathogenesis

- Blood glucose and atherosclerosis, 227
- Declining mortality in coronary heart disease, 312
- Flow studies in a model carotid bifurcation, 235
- George Lyman Duff Memorial Lecture: Atherosclerosis: a problem of the biology of arterial wall cells and their interactions with blood components, 293
- Vascular wall growth control: the role of the endothelium, 107

Atherosclerosis susceptibility

- Aortic glycosaminoglycans in genetically selected WC-2 pigeons with increased atherosclerosis susceptibility, 192

B**Baboon, see** Animal studies, baboon**Blood cells**

- George Lyman Duff Memorial Lecture: Atherosclerosis: a problem of the biology of arterial wall cells and their interactions with blood components, 293

Blood glucose

- Blood glucose and atherosclerosis, 227
- Blood glucose and risk of coronary heart disease, 33
- Effects of insulin exposure upon the metabolism of rat aortic media: influence of hydrostatic forces, 345
- Proaggregatory effect of fasting on platelet aggregation in the microcirculation of mice with streptozotocin diabetes, 127

Blood lipids

- Longitudinal study (32 years) of exercise tolerance, breathing response, blood pressure, and blood lipids in young men, 455

Blood pressure

- Longitudinal study (32 years) of exercise tolerance, breathing response, blood pressure, and blood lipids in young men, 455
- Studies of blood pressure in hyperlipidemic school children, 280

Bypass surgery

- Declining mortality in coronary heart disease, 312

C

Caffeine

Levels and interrelationships of serum and lipoprotein cholesterol and triglycerides. Association with adiposity and the consumption of ethanol, tobacco, and beverages containing caffeine, 13

Cannabinoids

Cannabinoids impair the formation of cholesteryl ester in cultured human cells, 449

Capillaries

Secretory phenotypes of endothelial cells in culture: comparison of aortic, venous, capillary, and corneal endothelium, 427

Carbon dioxide breathing response

Longitudinal study (32 years) of exercise tolerance, breathing response, blood pressure, and blood lipids in young men, 455

Cardiovascular response

Longitudinal study (32 years) of exercise tolerance, breathing response, blood pressure, and blood lipids in young men, 455

Cardiovascular system

Hormone receptors of the baboon cardiovascular system. Biochemical characterization of aortic cytoplasmic androgen receptors, 257

Carotid bifurcation

Flow studies in a model carotid bifurcation, 235

Catabolism, fibrinogen

Fibrinogen catabolism in patients with Type II and Type IV hyperlipidemia. Effect of dietary and clofibrate treatment on laboratory findings, 202

Cell culture

Acetoacetylated lipoproteins used to distinguish fibroblasts from macrophages in vitro by fluorescence microscopy, 177

Secretory phenotypes of endothelial cells in culture: comparison of aortic, venous, capillary, and corneal endothelium, 427

Cell growth, endothelium

George Lyman Duff Memorial Lecture: Atherosclerosis: a problem of the biology of arterial wall cells and their interactions with blood components, 293

Secretory phenotypes of endothelial cells in culture: comparison of aortic, venous, capillary, and corneal endothelium, 427

Vascular wall growth control: the role of the endothelium, 107

Cell surface

Secretory phenotypes of endothelial cells in culture: comparison of aortic, venous, capillary, and corneal endothelium, 427

Stimulation of cholesteryl ester synthesis in macrophages by extracts of atherosclerotic human aortas and complexes of albumin/cholesteryl esters, 210

Cerebral arteries

Risk factors and raised atherosclerotic lesions in coronary and cerebral arteries. Statistical analysis from the Oslo Study, 250

Children

Studies of blood pressure in hyperlipidemic school children, 280

Chlorpropamide-alcohol flushing

Blood glucose and atherosclerosis, 227

Cholesterol

Acetoacetylated lipoproteins used to distinguish fibroblasts from macrophages in vitro by fluorescence microscopy, 177

Aortic glycosaminoglycans in genetically selected WC-2 pigeons with increased atherosclerosis susceptibility, 192

Blood glucose and risk of coronary heart disease, 33

Cannabinoids impair the formation of cholesteryl ester in cultured human cells, 449

Effects of moderate hypercholesterolemia on rabbit endothelium, 25

Levels and interrelationships of serum and lipoprotein cholesterol and triglycerides. Association with adiposity and the consumption of ethanol, tobacco, and beverages containing caffeine, 13

Lipoprotein metabolism in nonresponders to increased dietary cholesterol, 463

Multivariate analyses of serum apolipoproteins and risk factors in relation to acute myocardial infarction, 273

Relationship of hypertriglyceridemia to atherosclerosis, 406

Relationship of lipoprotein cholesterol concentrations to experimental atherosclerosis in baboons, 3

Responses of serum lipoproteins to dietary cholesterol and type of fat in the baboon, 337

Risk factors and raised atherosclerotic lesions in coronary and cerebral arteries. Statistical analysis from the Oslo Study, 250

Stimulation of cholesteryl ester synthesis in macrophages by extracts of atherosclerotic human aortas and complexes of albumin/cholesteryl esters, 210

Studies of blood pressure in hyperlipidemic school children, 280

Transfer of plasma lipoprotein components and of plasma proteins into aortas of cholesterol-fed rabbits. Molecular size as a determinant of plasma lipoprotein influx, 38

Unresolved problems in the diet-heart issue, 164

Cholesterol exchange

Cholesterol transfer from normal and atherogenic low density lipoproteins to mycoplasma membranes, 134

Cholesterol-induced lipoproteins

Acetoacetylated lipoproteins used to distinguish fibroblasts from macrophages in vitro by fluorescence microscopy, 177

Cholesteryl ester

Cannabinoids impair the formation of cholesteryl ester in cultured human cells, 449

Relationship of hypertriglyceridemia to atherosclerosis, 406

Stimulation of cholesteryl ester synthesis in macrophages by extracts of atherosclerotic human aortas and complexes of albumin/cholesteryl esters, 210

Chromatography

Fibrinogen catabolism in patients with Type II and Type IV hyperlipidemia. Effect of dietary and clofibrate treatment on laboratory findings, 202

Chylomicron remnants

Relationship of hypertriglyceridemia to atherosclerosis, 406

Cigarette smoking

Blood glucose and risk of coronary heart disease, 33

Declining mortality in coronary heart disease, 312

Levels and interrelationships of serum and lipoprotein cholesterol and triglycerides. Association with adiposity and the consumption of ethanol, tobacco, and beverages containing caffeine, 13

Multivariate analyses of serum apolipoproteins and risk factors in relation to acute myocardial infarction, 273

Cincinnati Lipid Research Clinic's Princeton School Study

Studies of blood pressure in hyperlipidemic school children, 280

Clofibrate treatment

Fibrinogen catabolism in patients with Type II and Type IV hyperlipidemia. Effect of dietary and clofibrate treatment on laboratory findings, 202

Cold pressor test

Longitudinal study (32 years) of exercise tolerance, breathing response, blood pressure, and blood lipids in young men, 455

Collagen

Changes in aortic lysyl oxidase activity in diet-induced atherosclerosis in the rabbit, 287

- Secretory phenotypes of endothelial cells in culture: comparison of aortic, venous, capillary, and corneal endothelium, 427
- Computer processing of angiograms**
Angiographic trials of lipid-lowering therapy, 242
- Connective tissue protein**
Changes in aortic lysyl oxidase activity in diet-induced atherosclerosis in the rabbit, 287
- Cornea**
Secretory phenotypes of endothelial cells in culture: comparison of aortic, venous, capillary, and corneal endothelium, 427
- Coronary arteries**
Dietary ethanol-induced modifications in hyperlipoproteinemia and atherosclerosis in nonhuman primates (*Macaca nemestrina*), 144
Risk factors and raised atherosclerotic lesions in coronary and cerebral arteries. Statistical analysis from the Oslo Study, 250
- Coronary heart disease**
Angiographic trials of lipid-lowering therapy, 242
Blood glucose and atherosclerosis, 227
Blood glucose and risk of coronary heart disease, 33
Declining mortality in coronary heart disease, 312
Relationship of hypertriglyceridemia to atherosclerosis, 406
Risk factors and raised atherosclerotic lesions in coronary and cerebral arteries. Statistical analysis from the Oslo Study, 250
Unresolved problems in the diet-heart issue, 164
- Correlations**
Unresolved problems in the diet-heart issue, 164
- Council on Arteriosclerosis**
Abstracts submitted to the 34th Annual Meeting, Council on Arteriosclerosis, American Society for the Study of Arteriosclerosis, Miami Beach, Florida, November, 1980, 52
Abstracts submitted to the 35th Annual Meeting, Council on Arteriosclerosis, American Society for the Study of Arteriosclerosis, Dallas, Texas, November, 1981, 353a
- Cytoplasmic androphiles**
Hormone receptors of the baboon cardiovascular system. Biochemical characterization of aortic cytoplasmic androgen receptors, 257

D

- Δ^1 -tetrahydrocannabinol**
Cannabinoids impair the formation of cholesteryl ester in cultured human cells, 449
- Diabetes mellitus**
Blood glucose and atherosclerosis, 227
Blood glucose and risk of coronary heart disease, 33
Effects of insulin exposure upon the metabolism of rat aortic media: influence of hydrostatic forces, 345
Relationship of hypertriglyceridemia to atherosclerosis, 406
- Diabetes, streptozotocin**
Proaggregatory effect of fasting on platelet aggregation in the microcirculation of mice with streptozotocin diabetes, 127
Response of the aorta of the obese Zucker rat to injury, 186
- 3,3'-Diacylindocarbocyanine (DII)**
Acetoacetylated lipoproteins used to distinguish fibroblasts from macrophages in vitro by fluorescence microscopy, 177
- Diagnostic techniques**
Declining mortality in coronary heart disease, 312
Noninvasive techniques for assessment of atherosclerosis. Summary of a workshop sponsored by the National Heart, Lung, and Blood Institute, January 1980, 50

Diet, effects of

- Blood glucose and risk of coronary heart disease, 33
Changes in aortic lysyl oxidase activity in diet-induced atherosclerosis in the rabbit, 287
Declining mortality in coronary heart disease, 312
Effects of moderate hypercholesterolemia on rabbit endothelium, 25
Fibrinogen catabolism in patients with Type II and Type IV hyperlipidemia. Effect of dietary and clofibrate treatment on laboratory findings, 202
Lipoprotein metabolism in nonresponders to increased dietary cholesterol, 463
Relationship of lipoprotein cholesterol concentrations to experimental atherosclerosis in baboons, 3
Responses of serum lipoproteins to dietary cholesterol and type of fat in the baboon, 337
Unresolved problems in the diet-heart issue, 164
- Dog, see** Animal studies, dog
- Duff, George Lyman Memorial Lecture**
George Lyman Duff Memorial Lecture: Atherosclerosis: a problem of the biology of arterial wall cells and their interactions with blood components, 293

E

Editorial

- Arteriosclerosis, 1981, 405
An early progress report, 163
A new journal, 1

Elastin

- Changes in aortic lysyl oxidase activity in diet-induced atherosclerosis in the rabbit, 287

Electron microscopy

- Effects of oscillatory mechanical disturbance on macromolecular uptake by arterial wall, 326

Endocytosis

- Stimulation of cholesteryl ester synthesis in macrophages by extracts of atherosclerotic human aortas and complexes of albumin/cholesteryl esters, 210

Endothelium

- Effects of moderate hypercholesterolemia on rabbit endothelium, 25
Secretory phenotypes of endothelial cells in culture: comparison of aortic, venous, capillary, and corneal endothelium, 427
Vascular wall growth control: the role of the endothelium, 107

Endothelium injury

- George Lyman Duff Memorial Lecture: Atherosclerosis: a problem of the biology of arterial wall cells and their interactions with blood components, 293
In vitro synthesis of DNA, protein, and lipids by the de-endothelialized rabbit aorta, 418
Response of the aorta of the obese Zucker rat to injury, 186
Vascular wall growth control: the role of the endothelium, 107

Endothelium permeability

- Effects of moderate hypercholesterolemia on rabbit endothelium, 25
Effects of oscillatory mechanical disturbance on macromolecular uptake by arterial wall, 326

Epidemiology

- Blood glucose and atherosclerosis, 227
Declining mortality in coronary heart disease, 312
Flow studies in a model carotid bifurcation, 235
George Lyman Duff Memorial Lecture: Atherosclerosis: a problem of the biology of arterial wall cells and their interactions with blood components, 293
Relationship of hypertriglyceridemia to atherosclerosis, 406
Vascular wall growth control: the role of the endothelium, 107

Equilibrium exchange

Cholesterol transfer from normal and atherogenic low density lipoproteins to mycoplasma membranes, 134

Estrogens

Hormone receptors of the baboon cardiovascular system. Biochemical characterization of aortic cytoplasmic androgen receptors, 257

Relationship of hypertriglyceridemia to atherosclerosis, 406

Ethanol

Dietary ethanol-induced modifications in hyperlipoproteinemia and atherosclerosis in nonhuman primates (*Macaca nemestrina*), 144

Levels and interrelationships of serum and lipoprotein cholesterol and triglycerides. Association with adiposity and the consumption of ethanol, tobacco, and beverages containing caffeine, 13

Euglobulin activity

Fibrinogen catabolism in patients with Type II and Type IV hyperlipidemia. Effect of dietary and clofibrate treatment on laboratory findings, 202

Evans blue dye

Local aortic histamine metabolism and albumin accumulation. Differences between blue and white areas, 265

Exercise tolerance

Longitudinal study (32 years) of exercise tolerance, breathing response, blood pressure, and blood lipids in young men, 455

Extracellular matrix

Secretory phenotypes of endothelial cells in culture: comparison of aortic, venous, capillary, and corneal endothelium, 427

F**Familial hyperalphalipoproteinemia**

Lipoproteins in familial hyperalphalipoproteinemia, 156

Familial hypercholesterolemia

Platelet function and survival in patients with severe hypercholesterolemia, 443

Fasting

Proaggregatory effect of fasting on platelet aggregation in the microcirculation of mice with streptozotocin diabetes, 127

Fatty acids

Relationship of hypertriglyceridemia to atherosclerosis, 406

Relationship of lipoprotein cholesterol concentrations to experimental atherosclerosis in baboons, 3

Responses of serum lipoproteins to dietary cholesterol and type of fat in the baboon, 337

Unresolved problems in the diet-heart issue, 164

Fatty streaks

Relationship of lipoprotein cholesterol concentrations to experimental atherosclerosis in baboons, 3

Fibrinogen

Fibrinogen catabolism in patients with Type II and Type IV hyperlipidemia. Effect of dietary and clofibrate treatment on laboratory findings, 202

Fibrinolysis

Fibrinogen catabolism in patients with Type II and Type IV hyperlipidemia. Effect of dietary and clofibrate treatment on laboratory findings, 202

Fibroblasts

Acetoacetylated lipoproteins used to distinguish fibroblasts from macrophages in vitro by fluorescence microscopy, 177

Cannabinoids impair the formation of cholesteryl ester in cultured human cells, 449

Flow studies

Flow studies in a model carotid bifurcation, 235

Fluid dynamics

Flow studies in a model carotid bifurcation, 235

Fluorescence microscopy

Acetoacetylated lipoproteins used to distinguish fibroblasts from macrophages in vitro by fluorescence microscopy, 177

Foam cells

George Lyman Duff Memorial Lecture: Atherosclerosis: a problem of the biology of arterial wall cells and their interactions with blood components, 293

Framingham Study

Blood glucose and atherosclerosis, 227

G**Glycosaminoglycans**

Aortic glycosaminoglycans in genetically selected WC-2 pigeons with increased atherosclerosis susceptibility, 192

Göteborg, Sweden Study

Multivariate analyses of serum apolipoproteins and risk factors in relation to acute myocardial infarction, 273

Growth factors, endothelium

George Lyman Duff Memorial Lecture: Atherosclerosis: a problem of the biology of arterial wall cells and their interactions with blood components, 293

Vascular wall growth control: the role of the endothelium, 107

H**Hemodynamics**

Effects of insulin exposure upon the metabolism of rat aortic media: influence of hydrostatic forces, 345

Flow studies in a model carotid bifurcation, 235

Histamine

Local aortic histamine metabolism and albumin accumulation. Differences between blue and white areas, 265

Hormone receptors

Hormone receptors of the baboon cardiovascular system. Biochemical characterization of aortic cytoplasmic androgen receptors, 257

Human menopausal gonadotrophin-coenzyme A (HMG-CoA) reductase

Cannabinoids impair the formation of cholesteryl ester in cultured human cells, 449

Hyperalphalipoproteinemia

Lipoproteins in familial hyperalphalipoproteinemia, 156

Hypercholesterolemia

Blood glucose and risk of coronary heart disease, 33

Effects of moderate hypercholesterolemia on rabbit endothelium, 25

George Lyman Duff Memorial Lecture: Atherosclerosis: a problem of the biology of arterial wall cells and their interactions with blood components, 293

Platelet function and survival in patients with severe hypercholesterolemia, 443

Hypercholesterolemic low density lipoproteins

Cholesterol transfer from normal and atherogenic low density lipoproteins to mycoplasma membranes, 134

Hyperlipidemia

Studies of blood pressure in hyperlipidemic school children, 280

Hyperlipoproteinemia

Angiographic trials of lipid-lowering therapy, 242

Dietary ethanol-induced modifications in hyperlipoproteinemia and atherosclerosis in nonhuman primates (*Macaca nemestrina*), 144

Fibrinogen catabolism in patients with Type II and Type IV hyperlipidemia. Effect of dietary and clofibrate treatment on laboratory findings, 202

Relationship of hypertriglyceridemia to atherosclerosis, 406

Hypertriglyceridemia

Relationship of hypertriglyceridemia to atherosclerosis, 406

I

Injury

- George Lyman Duff Memorial Lecture: Atherosclerosis: a problem of the biology of arterial wall cells and their interactions with blood components, 293
- In vitro synthesis of DNA, protein, and lipids by the de-endothelialized rabbit aorta, 418
- Proaggregatory effect of fasting on platelet aggregation in the microcirculation of mice with streptozotocin diabetes, 127
- Response of the aorta of the obese Zucker rat to injury, 186

Insulin

- Blood glucose and atherosclerosis, 227
- Effects of insulin exposure upon the metabolism of rat aortic media: influence of hydrostatic forces, 345
- Relationship of hypertriglyceridemia to atherosclerosis, 406

Intima media

- Cannabinoids impair the formation of cholesteryl ester in cultured human cells, 449
- Effects of insulin exposure upon the metabolism of rat aortic media: influence of hydrostatic forces, 345
- In vitro synthesis of DNA, protein, and lipids by the de-endothelialized rabbit aorta, 418

L

Lecithin cholesterol acyl transferase (LCAT)

- Relationship of hypertriglyceridemia to atherosclerosis, 406

Lesion, femoral

- Angiographic trials of lipid-lowering therapy, 242

Lesion, raised atherosclerotic

- George Lyman Duff Memorial Lecture: Atherosclerosis: a problem of the biology of arterial wall cells and their interactions with blood components, 293
- Risk factors and raised atherosclerotic lesions in coronary and cerebral arteries. Statistical analysis from the Oslo Study, 250

Lifestyle

- Declining mortality in coronary heart disease, 312

Light plus dye

- Proaggregatory effect of fasting on platelet aggregation in the microcirculation of mice with streptozotocin diabetes, 127

Lipid-lowering therapy

- Angiographic trials of lipid-lowering therapy, 242

Lipid synthesis

- In vitro synthesis of DNA, protein, and lipids by the de-endothelialized rabbit aorta, 418

Lipoproteins, high density (HDL)

- Dietary ethanol-induced modifications in hyperlipoproteinemia and atherosclerosis in nonhuman primates (*Macaca nemestrina*), 144
- Levels and interrelationships of serum and lipoprotein cholesterol and triglycerides. Association with adiposity and the consumption of ethanol, tobacco, and beverages containing caffeine, 13
- Lipoproteins in familial hyperalphalipoproteinemia, 156
- Longitudinal study (32 years) of exercise tolerance, breathing response, blood pressure, and blood lipids in young men, 455
- Relationship of hypertriglyceridemia to atherosclerosis, 406
- Relationship of lipoprotein cholesterol concentrations to experimental atherosclerosis in baboons, 3
- Responses of serum lipoproteins to dietary cholesterol and type of fat in the baboon, 337
- Risk factors and raised atherosclerotic lesions in coronary and cerebral arteries. Statistical analysis from the Oslo Study, 250

Studies of blood pressure in hyperlipidemic school children, 280

Transfer of plasma lipoprotein components and of plasma proteins into aortas of cholesterol-fed rabbits. Molecular size as a determinant of plasma lipoprotein influx, 38

Unresolved problems in the diet-heart issue, 164

Lipoproteins, low density (LDL)

Acetoacetylated lipoproteins used to distinguish fibroblasts from macrophages in vitro by fluorescence microscopy, 177

Cannabinoids impair the formation of cholesteryl ester in cultured human cells, 449

Cholesterol transfer from normal and atherogenic low density lipoproteins to mycoplasma membranes, 134

Dietary ethanol-induced modifications in hyperlipoproteinemia and atherosclerosis in nonhuman primates (*Macaca nemestrina*), 144

George Lyman Duff Memorial Lecture: Atherosclerosis: a problem of the biology of arterial wall cells and their interactions with blood components, 293

Levels and interrelationships of serum and lipoprotein cholesterol and triglycerides. Association with adiposity and the consumption of ethanol, tobacco, and beverages containing caffeine, 13

Lipoprotein metabolism in nonresponders to increased dietary cholesterol, 463

Relationship of hypertriglyceridemia to atherosclerosis, 406

Relationship of lipoprotein cholesterol concentrations to experimental atherosclerosis in baboons, 3

Responses of serum lipoproteins to dietary cholesterol and type of fat in the baboon, 337

Stimulation of cholesteryl ester synthesis in macrophages by extracts of atherosclerotic human aortas and complexes of albumin/cholesteryl esters, 210

Transfer of plasma lipoprotein components and of plasma proteins into aortas of cholesterol-fed rabbits. Molecular size as a determinant of plasma lipoprotein influx, 38

Lipoproteins, very low density (VLDL)

Levels and interrelationships of serum and lipoprotein cholesterol and triglycerides. Association with adiposity and the consumption of ethanol, tobacco, and beverages containing caffeine, 13

Lipoprotein metabolism in nonresponders to increased dietary cholesterol, 463

Relationship of hypertriglyceridemia to atherosclerosis, 406

Relationship of lipoprotein cholesterol concentrations to experimental atherosclerosis in baboons, 3

Responses of serum lipoproteins to dietary cholesterol and type of fat in the baboon, 337

Transfer of plasma lipoprotein components and of plasma proteins into aortas of cholesterol-fed rabbits. Molecular size as a determinant of plasma lipoprotein influx, 38

Lipoproteins, very low density beta (β -VLDL)

Acetoacetylated lipoproteins used to distinguish fibroblasts from macrophages in vitro by fluorescence microscopy, 177

Relationship of hypertriglyceridemia to atherosclerosis, 406

Liver, role of

Relationship of hypertriglyceridemia to atherosclerosis, 406

Longitudinal studies

Blood glucose and risk of coronary heart disease, 33

Longitudinal study (32 years) of exercise tolerance, breathing response, blood pressure, and blood lipids in young men, 455

Risk factors and raised atherosclerotic lesions in coronary and cerebral arteries. Statistical analysis from the Oslo Study, 250

Studies of blood pressure in hyperlipidemic school children, 280

Lysosomes

Stimulation of cholesteryl ester synthesis in macrophages by extracts of atherosclerotic human aortas and complexes of albumin/cholesteryl esters, 210

Lysyl oxidase activity

Changes in aortic lysyl oxidase activity in diet-induced atherosclerosis in the rabbit, 287

M

Macromolecular uptake

Effects of oscillatory mechanical disturbance on macromolecular uptake by arterial wall, 326

Macrophages

Acetoacetylated lipoproteins used to distinguish fibroblasts from macrophages in vitro by fluorescence microscopy, 177

George Lyman Duff Memorial Lecture: Atherosclerosis: a problem of the biology of arterial wall cells and their interactions with blood components, 293

Stimulation of cholesteryl ester synthesis in macrophages by extracts of atherosclerotic human aortas and complexes of albumin/cholesteryl esters, 210

Mesenteric arterioles

Proaggregatory effect of fasting on platelet aggregation in the microcirculation of mice with streptozotocin diabetes, 127

Metabolism

Cannabinoids impair the formation of cholesteryl ester in cultured human cells, 449

Effects of insulin exposure upon the metabolism of rat aortic media: influence of hydrostatic forces, 345

Hormone receptors of the baboon cardiovascular system. Biochemical characterization of aortic cytoplasmic androgen receptors, 257

Lipoprotein metabolism in nonresponders to increased dietary cholesterol, 463

Local aortic histamine metabolism and albumin accumulation. Differences between blue and white areas, 265

Relationship of hypertriglyceridemia to atherosclerosis, 406

Mice, see Animal studies, mice

Microcirculation

Proaggregatory effect of fasting on platelet aggregation in the microcirculation of mice with streptozotocin diabetes, 127

Micropuncture

Proaggregatory effect of fasting on platelet aggregation in the microcirculation of mice with streptozotocin diabetes, 127

Microscopy

Acetoacetylated lipoproteins used to distinguish fibroblasts from macrophages in vitro by fluorescence microscopy, 177

Middle age, see Age

Models

Angiographic trials of lipid-lowering therapy, 242

Effects of oscillatory mechanical disturbance on macromolecular uptake by arterial wall, 326

Flow studies in a model carotid bifurcation, 235

Molecular size, lipoproteins

Transfer of plasma lipoprotein components and of plasma proteins into aortas of cholesterol-fed rabbits. Molecular size as a determinant of plasma lipoprotein influx, 38

Monocyte

George Lyman Duff Memorial Lecture: Atherosclerosis: a problem of the biology of arterial wall cells and their interactions with blood components, 293

Mortality

Declining mortality in coronary heart disease, 312

Multivariate analysis

Multivariate analyses of serum apolipoproteins and risk factors in relation to acute myocardial infarction, 273

Mycoplasma membranes

Cholesterol transfer from normal and atherogenic low density lipoproteins to mycoplasma membranes, 134

Myocardial infarction

Blood glucose and atherosclerosis, 227

Multivariate analyses of serum apolipoproteins and risk factors in relation to acute myocardial infarction, 273

N

National Heart, Lung, and Blood Institute

Arteriosclerosis, 1981, 405

Noninvasive techniques for assessment of atherosclerosis. Summary of a workshop sponsored by the National Heart, Lung, and Blood Institute, January 1980, 50

Relationship of hypertriglyceridemia to atherosclerosis, 406

Noninvasive techniques

Noninvasive techniques for assessment of atherosclerosis. Summary of a workshop sponsored by the National Heart, Lung, and Blood Institute, January 1980, 50

O

Obesity

Levels and interrelationships of serum and lipoprotein cholesterol and triglycerides. Association with adiposity and the consumption of ethanol, tobacco, and beverages containing caffeine, 13

Response of the aorta of the obese Zucker rat to injury, 186

Studies of blood pressure in hyperlipidemic school children, 280

Oscillatory mechanical disturbance

Effects of oscillatory mechanical disturbance on macromolecular uptake by arterial wall, 326

Oslo Study

Risk factors and raised atherosclerotic lesions in coronary and cerebral arteries. Statistical analysis from the Oslo Study, 250

P

Pesticide

Relationship of lipoprotein cholesterol concentrations to experimental atherosclerosis in baboons, 3

Phenotypes

Secretory phenotypes of endothelial cells in culture: comparison of aortic, venous, capillary, and corneal endothelium, 427

Physical inactivity

Longitudinal study (32 years) of exercise tolerance, breathing response, blood pressure, and blood lipids in young men, 455

Multivariate analyses of serum apolipoproteins and risk factors in relation to acute myocardial infarction, 273

Pial arterioles

Proaggregatory effect of fasting on platelet aggregation in the microcirculation of mice with streptozotocin diabetes, 127

Pigeon, see Animal studies, pigeon

Plaque

Blood glucose and atherosclerosis, 227

Flow studies in a model carotid bifurcation, 235

Stimulation of cholesteryl ester synthesis in macrophages by extracts of atherosclerotic human aortas and complexes of albumin/cholesteryl esters, 210

Plasma lipoproteins

Transfer of plasma lipoprotein components and of plasma proteins into aortas of cholesterol-fed rabbits. Molecular size as a determinant of plasma lipoprotein influx, 38

Plasma proteins

Transfer of plasma lipoprotein components and of plasma proteins into aortas of cholesterol-fed rabbits. Molecular size as a determinant of plasma lipoprotein influx, 38

Platelet aggregation

George Lyman Duff Memorial Lecture: Atherosclerosis: a problem of the biology of arterial wall cells and their interactions with blood components, 293

Platelet function and survival in patients with severe hypercholesterolemia, 443

Proaggregatory effect of fasting on platelet aggregation in the microcirculation of mice with streptozotocin diabetes, 127

Platelet-derived growth factor

George Lyman Duff Memorial Lecture: Atherosclerosis: a problem of the biology of arterial wall cells and their interactions with blood components, 293

Polyanions

Stimulation of cholesteryl ester synthesis in macrophages by extracts of atherosclerotic human aortas and complexes of albumin/cholesteryl esters, 210

Population studies

Blood glucose and risk of coronary heart disease, 33

Levels and interrelationships of serum and lipoprotein cholesterol and triglycerides. Association with adiposity and the consumption of ethanol, tobacco, and beverages containing caffeine, 13

Longitudinal study (32 years) of exercise tolerance, breathing response, blood pressure, and blood lipids in young men, 455

Multivariate analyses of serum apolipoproteins and risk factors in relation to acute myocardial infarction, 273

Risk factors and raised atherosclerotic lesions in coronary and cerebral arteries. Statistical analysis from the Oslo Study, 250

Studies of blood pressure in hyperlipidemic school children, 280

Unresolved problems in the diet-heart issue, 164

Primary prevention

Declining mortality in coronary heart disease, 312

Protein

Changes in aortic lysyl oxidase activity in diet-induced atherosclerosis in the rabbit, 287

Transfer of plasma lipoprotein components and of plasma proteins into aortas of cholesterol-fed rabbits. Molecular size as a determinant of plasma lipoprotein influx, 38

Protein synthesis

In vitro synthesis of DNA, protein, and lipids by the de-endothelialized rabbit aorta, 418

Secretory phenotypes of endothelial cells in culture: comparison of aortic, venous, capillary, and corneal endothelium, 427

Vascular wall growth control: the role of the endothelium, 107

Public health education

Declining mortality in coronary heart disease, 312

R

Rabbit, see Animal studies, rabbit

Race

Studies of blood pressure in hyperlipidemic school children, 280

Radioimmunoassay

Lipoproteins in familial hyperalphalipoproteinemia, 156

Rat, see Animal studies, rat

Receptors

Acetoacetylated lipoproteins used to distinguish fibroblasts from macrophages in vitro by fluorescence microscopy, 177

Hormone receptors of the baboon cardiovascular system. Biochemical characterization of aortic cytoplasmic androgen receptors, 257

Regression

George Lyman Duff Memorial Lecture: Atherosclerosis: a problem of the biology of arterial wall cells and their interactions with blood components, 293

Review, state of the art

Blood glucose and atherosclerosis, 227

Declining mortality in coronary heart disease, 312

Unresolved problems in the diet-heart issue, 164

Vascular wall growth control: the role of the endothelium, 107

Risk factors

Blood glucose and atherosclerosis, 227

Blood glucose and risk of coronary heart disease, 33

Declining mortality in coronary heart disease, 312

Levels and interrelationships of serum and lipoprotein cholesterol and triglycerides. Association with adiposity and the consumption of ethanol, tobacco, and beverages containing caffeine, 13

Longitudinal study (32 years) of exercise tolerance, breathing response, blood pressure, and blood lipids in young men, 455

Multivariate analyses of serum apolipoproteins and risk factors in relation to acute myocardial infarction, 273

Risk factors and raised atherosclerotic lesions in coronary and cerebral arteries. Statistical analysis from the Oslo Study, 250

Studies of blood pressure in hyperlipidemic school children, 280

S**Serum lipids**

Blood glucose and risk of coronary heart disease, 33

Levels and interrelationships of serum and lipoprotein cholesterol and triglycerides. Association with adiposity and the consumption of ethanol, tobacco, and beverages containing caffeine, 13

Multivariate analyses of serum apolipoproteins and risk factors in relation to acute myocardial infarction, 273

Sex-specific trend

Levels and interrelationships of serum and lipoprotein cholesterol and triglycerides. Association with adiposity and the consumption of ethanol, tobacco, and beverages containing caffeine, 13

Smooth muscle cells

Effects of insulin exposure upon the metabolism of rat aortic media: influence of hydrostatic forces, 345

George Lyman Duff Memorial Lecture: Atherosclerosis: a problem of the biology of arterial wall cells and their interactions with blood components, 293

In vitro synthesis of DNA, protein, and lipids by the de-endothelialized rabbit aorta, 418

Vascular wall growth control: the role of the endothelium, 107

Sodium fluorescein

Proaggregatory effect of fasting on platelet aggregation in the microcirculation of mice with streptozotocin diabetes, 127

Steroids

Hormone receptors of the baboon cardiovascular system. Biochemical characterization of aortic cytoplasmic androgen receptors, 257

Sterol efflux

Cannabinoids impair the formation of cholesteryl ester in cultured human cells, 449

Stress

Longitudinal study (32 years) of exercise tolerance, breathing response, blood pressure, and blood lipids in young men, 455

Stroke

Declining mortality in coronary heart disease, 312

Systolic blood pressure

Blood glucose and risk of coronary heart disease, 33

T**Tecumseh, Michigan study**

Blood glucose and risk of coronary heart disease, 33

Trials, therapeutic

Angiographic trials of lipid-lowering therapy, 242

Triglycerides

Levels and interrelationships of serum and lipoprotein cholesterol and triglycerides. Association with adiposity and the consumption of ethanol, tobacco, and beverages containing caffeine, 13

Lipoprotein metabolism in nonresponders to increased dietary cholesterol, 463

Multivariate analyses of serum apolipoproteins and risk factors in relation to acute myocardial infarction, 273

Relationship of hypertriglyceridemia to atherosclerosis, 406

Studies of blood pressure in hyperlipidemic school children, 280

V**Variable interaction**

Blood glucose and risk of coronary heart disease, 33

Veins

Secretory phenotypes of endothelial cells in culture: comparison of aortic, venous, capillary, and corneal endothelium, 427

Vesicles

Effects of oscillatory mechanical disturbance on macromolecular uptake by arterial wall, 326

W**Wall dynamics**

Effects of insulin exposure upon the metabolism of rat aortic media: influence of hydrostatic forces, 345

Effects of oscillatory mechanical disturbance on macromolecular uptake by arterial wall, 326
